

Warrenton Horse Works, PLLC

Health Care Plan Options 2008

Option A provides the best healthcare value for the traveling equine athlete at the highest level of risk.
Option B is for horses with moderate exposure and limited or local travel schedules.
Option C provides basic health care on a budget for horses at lower risk .
Option D - Geriatric Plan is designed to address the health care concerns for the older horse.

Farm call fees are not included in Health Care Plans. They are not subject to discount and are due at the time of service.

WHW Deworming Program is available to all Health Care Plan Levels for an additional \$75.
 Included are a year's worth of deworming pastes and a specific schedule to follow to help reduce your horses parasite load and the negative effects on his/her general health.

- 2 Equimax - Ivermectin + Praziquantel
- 1 Anthelcide - Oxibendazole
- 2 Strongid Paste - Pyrantel Pamoate
- 1 Panacur Paste - Fenbendazole

Panacur Power Packs (5 days of double dose fenbendazole) are also available for increased security in your deworming program.

Ask About:
Pfizer's PreventiCare® - Strongid Colic Insurance Program is offered separately from this program. Please ask about \$5,000 colic insurance program when enrolled in the Strongid 2CX daily worming program. No additional enrollment, application or examination fees are charged for clients enrolled in one of our Health Care Plans. Please visit - <http://www.equinepreventicare.com> for program details.
